Surperb CACTUS Dahlias

After growing a large number of the new varieties of true type Cactus Dahlias, I have selected the following collection as the best of them all for exhibition purposes and Garden Decoration:

- A. R. PERRY.** Old rose, tipped with gold. Large exhibition flowers with long, narrow incurved petals. \$1.00.
- AMBER GLOW.** A Cactus of the highest English type, petals are long, narrow and straight. Size immense. Stem is as good as its parent, Pierrot. The color is bright yellow, deepening to pale orange at the center. An incomparable exhibit blossom which is also good for cutting. \$3.00.
- BALLET GIRL.** A new California introduction of particular merit. The coloring is unique, orange with a combination of white. Flowers are very large with good stems. Good for exhibition. \$2.50.
- BONNIE G.** A Cactus of the scarcest shade in dahlias, a true pink, paler than Delice and deeper than E. F. Hawes. The stem is fair, and this variety will be good for cutting where the constant fogs have a tendency to weaken stems. Is a tall grower and produces very large flowers with great freedom. To a lover of pink flowers, nothing so dainty and pretty has been offered since France introduced Delice. Tubers \$2.50, plants \$1.25
- CURLEW.** Old rose, a distinct and pleasing self-color, massive full flowers, very long florets incurving right over center; splendid size and shape. Strong flower stems, free bloomer. \$1.00.
- DOROTHY DURNBAUGH.** A most attractive shade of deep, rich pink, flowers are immense in size; of fine form and habit, with strong stems, that hold up well; one of the best Cactus Dahlias in cultivation. Fine for cutting. \$2.00.
- E. F. HAWES.** Clear, delicate pink, a shade admired and in demand as a cut flower. Flowers on strong, erect stems. 75c.
- GLADYS BATES.** One of the popular new dahlias in contrasting shades. Immense, heavy blooms of incurved petals of tan, with a reverse of rose. The oddity of coloring is all that is needed to make this dahlia attractive, but it has every good point as well. Perfect form, closed centre, long, straight stems, and a profusion of blooms. This dahlia is but slightly removed from the English class and some people dispute our classification for it of American Cactus. \$2.50.
- GWENDOLINE TUCKER.** One of the best silvery flesh pinks, shading lighter in center. Giant blooms are held erect on extra long stems. \$1.00.
- IRENE SATIS.** Bright amber, tinted bronze. Large, perfectly formed flowers, held erect on fine stems; blooms freely and constantly. One of the best true cactus. \$1.00.
- IVORY WHITE.** A creamy white of extra large size; much like 'F. W. Fellows' in form. Strong grower, good habit and fine stems. One of the best exhibition sorts. \$1.00.
- JULIAN.** Flesh pink, fading to almost white in the center. Exceptionally large, moderately incurved and very narrow florets. Has good stems and is a free bloomer. \$1.00.
- LADY SWATHLING.** A beautiful salmon pink passing to amber in center. One of the largest cactus and quite erect. \$1.00.

PRIZE WINNING CACTUS DAHLIAS—Continued

PIERROT... This we regard as one of the finest of the new English introduction; the very large flowers are of splendid form and are borne in wonderful profusion, the color varies considerably, the ground color being a rich shade of amber slightly tinged with bronze; a part of the flowers are tipped with white, while others are solid color, but in this case the variation adds to the charm of the flower. 75c.

REV. T. W. JAMIESON. This is one of the best Dahlias I have ever sold, and whether for first class exhibition or any other purpose it will be in the front rank. The coloring is also of the best, the central younger and unopened petals being yellow, but this quickly changes to rose-lilac; the older florets having edgings of deeper color, and extreme tips yellow. 50c.

RICHARD BOX. A pleasing shade of soft yellow, the long, incurving florets forming a beautiful exhibition flower. It flowers early and maintains a steady average of fine flowers throughout the season. 75c.

Giant Hybrid CACTUS Dahlias

This type of Dahlia is becoming one of the most popular of the Dahlia family. They have broader and more massive petals. As a cut flower they are excellent, having, as they most all do, long, stiff stems.

The floral sensation of Los Angeles; the color is a soft yellow buff, shaded salmon-pink; flowers of pleasing form, and enormous size, 7 to 10 in. without disbudding; the splendid flowers are held erect well above the foliage on the strongest stems I have ever seen on a Cactus Dahlia. GIANT HYBRID CACTUS DAHLIAS—Continued

- CALIFORNIA BEAUTY.** The color is the nearest approach to a pure copper I have seen in a Dahlia; the flowers of medium size are produced great profusion, much resembling the "Golden West" in shape and habit, but probably not quite so large; as a cut flower this is certain to be in much demand. \$1.50.
- CALIFORNIA ENCHANTRESS.** This novelty has immense blooms of great substance. It is a delightful shade of pale pink. The stems are fine and it is free flowering. \$2.50.
- CLAREMONT.** Novelty of the daintiest colorings. Soft rose pink with cream shadings. The lovely large flowers are held high above the bush on extra long stiff stems. This Dahlia is a prize winner, one of the attractions at the Dahlia Shows, and a great favorite in our garden. \$1.50.
- DIANA (Holland Hybrid).** Crimson with violet reflex. Good stems and is considered one of the "good ones" in the Holland varieties. \$1.00
- EDITH SLOCOMBE (a true hybrid cactus).** This dahlia is finely formed on long wiry stem, of a wonderful shade of rich, purplish, garnet shaded, velvet maroon, a most wonderful striking flower. Plants \$2.50, tubers \$5.00.
- ELSIE OLIVER.** We find that it is difficult to write a description. As nearly as we can describe the coloring, it is a creamy pink shading to cream in the center. But while the color is an exquisite feature, a blossom of any color would be a prize winner with its immense size and formation. The type is perfect hybrid cactus, with long evenly rolled petals and a good center. We have the impression that it is the largest variety of its type on the market. The branching bushes were laden with blooms all season and attracted most unusual attention and admiration. The stems are good. Tubers \$7.50, plants \$3.75.
- FRANCIS LOBDELL (Waite).** New variety. Like all good varieties, this one has to be seen to be appreciated. The plants will stand without staking and are completely covered with large blooms from early until late; the color is mallow pink, shading to white in the center. Received certificate at A. D. S. Trial Grounds, 1922. A splendid introduction. Tubers \$10.00, plants \$5.00.
- GEE WHIZ.** Of large size and pleasing shape; the color is a soft buff shaded with salmon; a dahlia that always comes perfectly double, never shows an open center. Tubers \$3.00, plants \$1.50.
- GLADYS SHERWOOD.** As compared with other white dahlias this is a giant among pygmies; flowers 9 inches in diameter without disbudding; the flowers are of fine form and are held erect on strong stems, very free flowering. As a garden flower this has no equal among the whites. \$3.00.
- HELEN DURNBAUGH.** This is one of our most popular dahlias; it is good every way; we can't too highly recommend it. Mr. Broomall certainly added a good one to our list in this splendid flower. Color nearly white with partial shading of bright pink; late in season quite pale pink. It is a fluffy serrated petal flower and reminds us of the real peony. \$1.00.
- LA FAVORITA.** A splendid Novelty shading from a dark reddish salmon in the center to a salmon-pink at the twisted points. Perfect form; strong, long stem; fine cut flower. \$1.50.
- LAURINE.** Deep pink, a shade darker than Dorothy Durnbaugh; the flowers are twice as large as that variety, and are held erect on splendid long stems; a strong grower and profuse bloomer. Plants only \$5.00.

GIANT HYBRID CACTUS DAHLIAS—Continued

- LILY GRAND.** A massive pure white of great depth and substance. The habit of the plant is dwarf; the large flowers are produced in profusion and were so numerous at times that the bushes looked like a high snowbank. It is a grand exhibition variety. Tubers \$5.00, plants \$2.50.
- MILTON EDWARDS.** This is what all are looking for, an entirely new shade. The odd, new coloring is best described as henna. Then there is no hybrid cactus like it in formation. The great number of long, claw shaped petals, incurve and interlace in an irregular but beautiful manner and build up splendid specimens of this popular type. Enormous flowers are borne well above the foliage on long, rigid stems. Tubers \$3.00, plants \$1.50.
- MINAMOTO.** A most wonderful shade of brilliant scarlet. Flowers of enormous size and long stiff stems. \$2.00.

- MRS. ETHEL F. T. SMITH.** Creamy white shading to a lemon tint in the center. This is the largest Dahlia I have grown, producing blooms up to $10\frac{3}{4}$ inches in diameter without disbudding; it is a profuse bloomer, and the flowers are held far above the foliage on strong stems, winning the admiration of all visitors. Tubers \$3.00, plants \$1.50.

GIANT HYBRID CACTUS DAHLIAS—Continued

DECORATIVE DAHLIAS

NOVELTIES

We have observed during the last few seasons a growing tendency on the part of the public who frequent Horticultural Exhibitions to favor the exhibits of hugh Decorative varieties. This impressed us so much that we decided to grow all the introductions, and to select therefrom those which pleased us in regard to habit of growth—particularly the way in which the flowers were produced upon the plants—floriferousness and general effectiveness in the garden. In size they cannot be equaled and for decorative purpose they are unexcelled.

This collection includes all the Giant Decorative Dahlias. Some of them attaining the grand dimensions of 8 or 9 inches in diameter. The flowers growing as they do upon long stems are splendid for Decorative purposes and for exhibition, win Prizes wherever shown.

AGNES HAVILAND. Color rose-pink, slightly suffused yellow; the flowers are born on long stems, well out from the foliage; a tall robust grower. \$3.00.

AMUN RA. An immense decorative of an entirely new formation, and resembling in color a glorious setting sun. The outer petals of the mammoth blooms are of gorgeous shades of copper, gold and amber, and the centers, full and perfect, deepen in tone to a rich reddish bronze. The blossoms are held absolutely erect on extra stout stems, well above a plant that is strong and vigorous. Tubers \$7.50, plants \$3.75.

AMY ROBSART. An immense decorative of a pleasing deep coral shade with apricot reverse. The petals curl and twist in such manner as to show the reverse as much as the front and curling backwards make a deep as well as large flower. Strong upright stems, a free bloomer and good keeper. Tubers \$3.00, plants \$1.50.

APEX. A large round, heavy flower; the color is yellow at the base of the petals, shading out to autumn buff at the tips; one of the best. Tubers \$3.00, plants \$1.50.

AZALEA. A large and beautiful variety. The color is a soft creamy yellow with apricot shades. Good stems and habit. \$1.00.

BEN WILSON. A grand new variety of large size with excellent stems. Color is a bright buff, heavily shaded with rich red and also tipped with yellow. Very attractive as a garden plant or on exhibition. \$2.00.

BERTHA STORY. A very large flower of beautiful rose pink on long stem. Sometimes has a wide white stripe through center of each petal and sometimes is a true decorative. \$1.00.

BONNIE BRAE. Cream, shaded blush-pink; the flowers are of true decorative form and immense in size, but not suitable for cutting, as the enormous flowers are apt to be too heavy for the stem. \$3.00.

BYRON. This does as well in our gardens as most any Dahlia we have, and we consider it one of the finest in existence. Of immense size and great depth. The petals are beautifully quilled, and are of a rich, deep wine color. \$1.00.

BYRON STREETER. Enormous decorative with slightly reflexed petals. Indescribable and fascinating shade of lilac purple, overlaid with a peculiar bluish sheen. Robust habit; flowers very erect on stout stems. \$2.00.

- LOYALTY.** A color that is hard to get, a royal purple. A wonderful keeper, flowers of enormous size and very long stiff stems. \$2.00.

MARY C. BURNS. Very large flower of the beautiful two-toned coloring. A sensational Dahlia. The outside of the petals are of old gold, and the reverse a dull red. Another invaluable Autumn-hued Dahlia, as the stems are long and stiff, and it keeps unusually well when cut. This is one of our favorite Dahlias. \$3.50.

MERITORIOS. In this new variety we have one which is rightly named. The ground is yellow, shading to orange buff extending out to white tips, the whole being suffused with a golden sheen. The combination of colors are so blended that the flowers attracted as much attention as any flower we showed last year. The blooms are large and stems long. This flower has won certificates at Newport, Providence, Boston, New Bedford, and at the Trial Grounds at Storrs, Conn., it scored 86 points, winning a certificate from the American Dahlia Society. \$2.00.

MILLIE RODGERS. Tubers \$2.50, plants \$1.25.

MISS LEOTA COTA. A more beautiful blending of creamy buff and pink would be hard to imagine; the flowers are enormous, coming 10 inches in diameter. Tubers \$3.00, plants \$1.50.

MR. ALEX. WALDIE. One of the most beautiful of dahlias. Gives immense flowers, held erect on strong stems. In color unsurpassed; a creamy ground overlaid with delicate salmon-pink, floral rays wide and full. By its bigness, color and form it captivates all. Tubers \$5.00, plants \$2.50.

MRS. CARL SALBACH. The 1920 sensational Decorative Dahlia. Levender pink in color, showing up well in the garden, as the immense blooms are held erect on long especially good strong stems. MRS. ESTELLE LAWTON LINDSEY. Scarlet and gold; the gorgeous coloring of the well known "Geisha" reproduced in an enormous full-centered decorative; the color varies on different blooms, but the two colors are always in evidence; the immense flowers, 7 to 9 in. in diameter, are on strong stems; keeps well as a cut flower. Tubers \$5.00, plants \$2.50.

MRS. J. FRACKLETON. Amaranth pink, shading to lighter center. \$1.00.

MRS. GERTRUDE DARLING. This we consider one of the best new dahlias offered in the east, because of its wondrous coloring, and autumn shade that is in very much demand. Orange buff suffused with apricot, shaded darker in the center. Of extra large size, and very strong upright stems. Flowers are produced in abundance on a strong, bushy plant. At the American Dahlia Society Trial Grounds at Storrs, Conn., it was one that showed up well and was awarded a certificate. \$1.50.

NOVELTIES—Continued.

ROSA NELL. The color is a clear, bright rose, the flowers are large, and I consider it the best shaped Decorative Dahlia I have seen, coming perfectly full and double until frost; good stems and habit. If I could have but one Decorative Dahlia, this would be my choice, as the color is a rare one in dahlias and attracts immediate attention, while in form cannot be surpassed. This dahlia when it becomes known, will be in every flower lover's garden. The highest praise of this grand dahlia has been received from all parts of the country where it has been tried. Tubers \$3.00, plants \$1.50.

The stem is absolutely perfect, long and stiff, and holds erect the big blossom. It will bloom constantly and freely from early to late season and never show a center, and also has excellent keeping qualities as a cut flower. One of its most unusual features is the attractive, lace like foliage. The plant is a very tall and robust grower. Tubers \$7.50, plants \$3.75.

SOROSIS. A very dark velvety red, as the originator says so, I say the best on the market. The blooms are mammoth in size, on long stems. Tubers \$5.00, plants \$2.50.

SPA. This is a prolific and continuous producer of immense flowers. The bushes are very dwarfed and should be planted in the outer row of a dahlia patch.
